

**MDC User Workgroup Meeting Minutes
07.10.07**

Members in attendance:

- **Chad Homme – Salida Fire District**
- **Steve Hall – Patterson/West Stanislaus Fire District**
- **Lisa Byrne – SR911**
- **Dan Doty – SR911**
- **Mike Kraus – Modesto Fire Department**
- **Ray Jackson – Fire Warden’s Office**
- **Steve Mayotte – Stanislaus Consolidated Fire District**

I. MDC Extended Service Contracts

- a. **Notified agencies that I have become aware that most of the initial MDC’s that were purchased in the county have warranties that expire in November of 2007.**
- b. **Advising agencies to look into extending warrantied beyond the initial warranty.**
- c. **Other option that was raised by Dan Doty was to look into leasing new MDC’s. This may be a more cost effective method for agencies to purchase MDC’s.**

II. MDC Maps

- a. **Issue was raised that Chad Homme believes that maps may be severely outdated on MAP server.**
- b. **Suggestion to agencies to verify that maps are up to date.**

III. MDC ICS Forms

- a. **Notified users that due to request, I have placed all ICS forms on the www.salidafire.com web site under the Communications sections.**

- b. Users may wish to copy these files to MDC's. These files are in Microsoft Word format, so they are editable, can be saved, and can be emailed.**

IV. MDC Licensing Discussion

- a. Discussed the fact that MDC licensing information/pricing information was sent out to all agencies after last MDC workgroup meeting.**
- b. Reminded agencies that the new CAD will have a site license for the mobile portion. This does not include frame relay, netmotion, etc., licensing. This will, however, save agencies about \$380 per MDC for licensing the MDC client.**
